

SAFETY DATA SHEET

1. PRODUCT AND COMPANY IDENTIFICATION

Product Identifier

Product Name 72300

Recommended Use of the Chemical and Restrictions on Use
Recommended Use Flexible Polyester Fillet Putty

Details of the Supplier of the Safety Data Sheet

Supplier's details

DBF, Inc. 18576 Krause PO Box 2385 Riverview, MI 48193 Phone: 734-285-1480

24 Hour Emergency Telephone Number Chemtrec 800-424-9300 (North America)

2. HAZARDS IDENTIFICATION

Classification

Flammable Liquids	Category 3
Acute Toxicity: Inhalation	Category 4
Skin Corrosion/Irritation	Category 2
Serious Eye Damage/Eye Irritation	Category 2A
Carcinogenicity	Category 2
Reproductive Toxicity	Category 2
Specific target organ toxicity (single exposure)	Category 3
Specific target organ toxicity (repeated exposure)	Category 1
Aspiration Hazard	Category 1

Signal Word Danger

Hazard Statements

Flammable liquid and vapor
Harmful if inhaled.
Causes skin irritation.
Causes serious eye irritation.
Suspected of damaging the unborn child.
Suspected of causing cancer.
May be fatal if swallowed and enters airways.
May cause respiratory irritation.

Causes damage to organs through prolonged or repeated exposure (ears, kidneys)

Precautionary Statements - Prevention

Wear protective gloves/protective clothing/eye protection/face protection.

Keep away from heat, sparks, open flames and hot surfaces - No smoking.

Use explosion proof electrical, ventilating, lighting, and all material handling equipment.

Use only non-sparking tools. Take precautionary measures against static discharge.

Use outdoors or in well-ventilated area. Keep container tightly closed.

Do not breathe dust/fume/gas/mist/vapors/spray.

Do not eat, drink or smoke when using this product

Use only outdoors or in a well-ventilated area.

Wash face, hands and any exposed skin thoroughly after handling.

Keep dust/air mixtures away from ignition sources.

Hazardous polymerization can occur under certain conditions. Avoid excessive heat, direct sunlight, peroxides, and other polymerization catalysts. Store in a cool place and maintain proper concentrations of inhibitor and oxygen.

Precautionary Statements - Response

Get medical attention if you feel unwell.

IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing for several minutes. If eye irritation persists: Get medical attention

IF ON SKIN (or hair): Wash with plenty of soap and water. Take off contaminated clothing and wash it before reuse. If skin irritation occurs: Get medical attention.

IF INHALED: If breathing is difficult, remove victim to fresh air and keep at rest in a position comfortable for breathing.

Precautionary Statements - Storage

Store containers in a safe place. Store in a well-ventilated place. Keep container tightly closed. Keep cool.

Precautionary Statements - Disposal

Dispose of contents/container in accordance with all local, regional, national and international regulations. Do not pressurize, cut, weld, braze, solder, drill, grind or expose containers to heat or sources of ignition.

3. COMPOSITION/INFORMATION ON INGREDIENTS

Chemical Name	CAS No	Weight-%
Unsaturated Polyester Polymer	Mixture	<60
Styrene	100-42-5	<30
Amorphous Silica	112945-52-5	<8
Milled Fibers	65997-17-3	<8
2-phenylpropene	98-83-9	<1
dimethyl glutarate	1119-40-0	<1
dimethyl adipate	627-93-0	<1
N.N-dimethylaniline	121-69-7	<.2

4. FIRST AID MEASURES

First Aid Measures

General Advice Provide this SDS to medical personnel for treatment.

Eye Contact Immediately flush with plenty of water for at least 10 minutes occasionally lifting upper and

lower eyelids. Check for and remove contacts lenses. Get medical attention.

Skin Contact Flush contaminated skin with plenty of water for at least 10 minutes. Remove contaminated

clothing and shoes. Ge medical attention. Wash contaminated clothing before reuse.

Clean shoes thoroughly before use.

Inhalation Remove victim to fresh air and keep at rest in a position comfortable for breathing. If not

breathing, if breathing is irregular or if respiratory arrest occurs, provide artificial respiration or oxygen by trained personnel. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. Get medical attention. If unconscious, place in recovery position and get medical attention immediately. Maintain an open airway. Loosen tight

clothing such as a collar, tie, belt, or waistband.

Ingestion Wash out mouth with water. Remove dentures if any. Remove victim to fresh air and keep

at rest in a position comfortable for breathing. If material has been swallowed and the exposed person is conscious, give small quantities of water to drink. Stop if the exposed person feels sick as vomiting may be dangerous. Do not induce vomiting unless directed to do so by medical personnel. If vomiting occurs, the head should be kept low so that vomit does not enter the lungs. Get medical attention following exposure of if feeling unwell. Never give anything by mouth to an unconscious person. If unconscious, place in recovery position and get medical attention immediately. Maintain and open airway. Loosen tight clothing such as collar, tie, belt or waistband.

Most Important Symptoms and Effects, both Acute and Delayed

Potential acute health effects

Eye contact Causes serious eye irritation.

Inhalation Harmful if inhaled. May cause respiratory irritation.

Skin contact Causes skin irritation.

Ingestion Irritating to mouth, throat and stomach.

Over-exposure signs/symptoms

Eye ContactAdverse symptoms may include the following: pain or irritation, watering, redness.
Inhalation
Adverse symptoms may include the following: respiratory tract irritation, coughing.

Skin contact Adverse symptoms may include the following: irritation, redness.

Ingestion No specific data.

Indication of any Immediate Medical Attention and Special Treatment Needed, if necessary

Note to Physicians Treat symptomatically. Contact poison treatment specialist immediately if large quantities

have been ingested or inhaled.

5. FIRE-FIGHTING MEASURES

Extinguishing media

Suitable Extinguishing Media Dry chemical, CO2, water spray (fog) or foam.

Unsuitable Extinguishing Media Do not use water jet.

Specific Hazards Arising from the

chemical

Flammable liquid and vapor. In a fire or if heated, a pressure increase will occur and

the container may bures, with the risk of subsequent explosion.

Hazardous thermal decomposition

products

Decomposition products may include the following materials:

carbon dioxide, carbon monoxide.

Special protective actions for

firefighters

Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training. Move containers from fire area if this can be done without risk. Use water

spray to keep fire-exposed containers cool.

Special protective equipment for

firefighters

Firefighters should wear appropriate protective equipment and selfcontained breathing apparatus (SCBA) with a full face-piece operated in

positive pressure mode.

6. ACCIDENTAL RELEASE MEASURES

Personal Precautions, Protective Equipment and Emergency Procedures

For non-emergency personal

No action shall be taken involving any personal risk or without suitable training. Evacuate surrounding arias. Keep unnecessary and unprotected personnel from entering. Do not touch or walk through spilled material. Shut off all ignition sources. No flares, smoking or flames in hazard area. Avoid breathing vapor or mist. Provide adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Put on appropriate personal protective equipment.

For emergency responders If specialized clothing is required to deal with the spillage, take note of any information in

Section 8 on suitable and unsuitable materials. See also the information in "For non-

emergence personnel".

Environmental Precautions Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and

sewers. Inform relevant authorities if the product has environmental pollution (sewers,

waterways, soil or air)

Methods and Material for Containment and Cleaning Up

Small spill Stop leak if without risk. Move containers from spill area. Scoop into appropriate waste

disposal container. Dispose of via a licensed waste disposal contractor.

Large spill Stop leak if without risk. Move containers from spill area. Approach release from upwind.

Prevent entry into sewers, water courses, basements or confined areas. Contain and

Prevent entry into sewers, water courses, basements or confined areas. Contain and collect spillage with absorbent material e.g. sand, earth, vermiculite or diatomaceous earth and place in container for disposal according to local regulations (see Section 13). Dispose of via a licensed waste disposal contractor. Contaminated absorbent may pose the same hazard as the spilled product. Note: see Section 1 for emergency contact information and

Section 13 for waste disposal.

7. HANDLING AND STORAGE

Precautions for Safe Handling

Protective measures Put on appropriate protective equipment (see Section 8). Avoid exposure – obtain special

instructions before use. Do not handle until all safety precautions have been read and understood. Do not get in eyes or on skin or clothing. Do not breathe vapor or mist. Do not ingest. Use only with adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Do not enter storage areas and confined spaces unless adequately ventilated. Keep in the original container or an approved alternative made from a compatible material, kept tightly closed when not in use. Store and use away from heat, sparks, open flame or any other ignition source. Empty containers retain product residue and can be hazardous.

Do not reuse containers.

Advice on general Occupational hygiene

Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating

areas. See also Section 8 for additional information on hygiene measures.

Conditions for Safe Storage, Including any Incompatibilities

Do not store above 38°C (100.4°F). Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10) and food and drink. Separate from oxidizing materials. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabeled containers. Use appropriate containment to avoid environmental contamination.

8. EXPOSURE CONTROLS/PERSONAL PROTECTION

Control measures

Occupational exposure limits

Chemical Name	ACGIH TLV	OSHA PEL	NIOSH
Styrene	TWA: 20 ppm 8 hours	TWA: 100 ppm 8 hours	TWA: 50 ppm 10 hours
	TWA: 85 mg/m ³ 8 hours	CEIL: 200 ppm	TWA: 215 mg/m ³ 10 hours
	STEL: 40 ppm 15 minutes STEL: 170 mg/m³ 15 minutes	AMP: 600 ppm 5 minutes	STEL: 100 ppm 15 minutes STEL: 425 mg/m ³ 15 minutes
2-phenylpropene	TWA: 10 ppm 8 hours	CEIL: 100 ppm CEIL: 480 mg/m³	-

N,N-dimethylaniline	Absorbed through skin. TWA: 5 ppm 8 hours. TWA: 25 mg/m³ 8 hours. STEL: 10 ppm 15 minutes. STEL: 50 mg/m³ 15 minutes	Absorbed through skin. TWA: 5 ppm 8 hours. TWA: 25 mg/m³ 8 hours.	-
Amorphous Silica	-	TWA: 6 mg/m ³	-

Appropriate Engineering Controls Use only with adequate ventilation. Use process enclosures, local exhaust ventilation or other engineering controls to keep worker exposure to airborne contaminants below any recommended or statutory limits.

Environmental exposure controls

Emissions from ventilation or work process equipment should be checked to ensure they comply with the requirements of the environmental protection legislation.

Individual Protection Measures

Hygiene measures

Wash hands, forearms and face thoroughly after handling chemical products, before eating, smoking and using the lavatory and at the end of the working period. Appropriate techniques should be used to remove potentially contaminated clothing. Wash contaminated clothing before reusing. Ensure that eyewash stations and safety showers

are close to the workstation location.

Eye/face protection Safety eyewear complying with an approved standard should be used when a risk

assessment indicates this is necessary to avoid exposure to liquid splashes, mists, gasses or

dusts

Hand protection Chemical-resistant, impervious gloves complying with and approved standard should be worn

at all times when handling chemical products if a risk assessment indicates this is necessary.

Body protection Personal protective equipment for the body should be selected based on the task being

performed and the risks involved and should be approved by a specialist before handling this

product.

Other skin protection Appropriate footwear and any additional skin protection measures should be selected based

on the task being performed and the risks involved and should be approved by a specialist

before handling this product.

Respiratory Protection Use a properly fitted, air-purifying or air-fed respirator complying with an approved standard

> if a risk assessment indicates this is necessary. Respiratory selection must be based on known or anticipated exposure levels, the hazards of the product and the safe working limits

> > (Closed Cup)

(For unsaturated polyester resin)

of the selected respirator.

9. PHYSICAL AND CHEMICAL PROPERTIES

Information on Basic Physical and Chemical Properties

Property The physical-chemical properties of this material have not been fully investigated.

Physical State Liquid

Appearance Viscous liquid

Color Gray Odor Styrene **Odor Threshold** .01 to .1 ppm Not determined pН **Melting Point** Not determined

Boiling Point 145.2°C (293.4°F) 31.1°C (88°F) Flash Point

Evaporation Rate Less than 1 (for styrene) (Butyl Acetate=1)

Upper Flammability Limits 6.1% **Lower Flammability Limit** 1.1%

Vapor Pressure 0.57 kPa (4.3 mmHg) (room temperature) (for styrene)

Vapor Density 3.6 (for Styrene) (Air = 1)

Specific Gravity1.15 – 1.25Solubility in waterInsolubleSolubility in Other SolventsNot availablePartition CoefficientNot determinedAuto-ignition Temperature490°C (914°F)

Decomposition Temperature Not available Low stability hazard expected at normal operating temperatures

Viscosity

Styrene loss after catalyzing Less than .1% When used as intended.

Not determined

10. STABILITY AND REACTIVITY

ReactivityNo specific test data related to reactivity available for this product or its ingredients.

Chemical stability The Product is stable.

Possibility of hazardous reactions Hazardous reactions or instability may occur under certain conditions or storage or use.

Conditions to Avoid

Do not pressurize, cut, weld, braze, solder, drill, grind or expose containers to heat and flame. Hazardous polymerization may occur under certain conditions of storage our use.

Keep away from heat and direct sunlight. Keep away from heat and flame. Keep away

(for styrene)

from oxidizing agents.

Incompatible Materials Reactive or incompatible with the oxidizing materials, acids, and alkalis.

Incompatible with alkali metals, some alkalis, and some strong acids.

Hazardous decomposition products Under normal conditions of storage and use, hazardous decomposition products should not

be produced.

11. TOXICOLOGICAL INFORMATION

<u>Sensitization</u> May cause skin sensitization by skin contact.

Mutagenicity Not Available.

Carcinogenicity

<u>Classification</u>

Product/ingredient name	OSHA	IARC	NTP
Styrene		2A	Reasonably anticipated to be a human carcinogen.
2-phenylpropene		2B	-

- 1) Negative Study A published study concluded that the mechanism for producing cancer in mice exposed to styrene is not applicable in human metabolism. (June 2013 Pharmacology & Toxicology 66 (2013))
- 2) Negative Study A recent update to an extensive study of reinforced plastic workers from 1948-1977 concluded that there was no coherent evidence that styrene exposure increased risk of cancer (March 2013 Epidemiology Vol. 24 Issue 2)
- 3) Positive Study Styrene induced pulmonary toxicity and carcinogenicity in mice was shown to be caused by a metabolite of styrene, probably styrene oxide. (Dec.2001 Toxicology Vol.169 Issue 2)

Reproductive toxicity Suspected of damaging the unborn child.

<u>Teratogenicity</u> Not available

Specific target organ toxicity (single exposure)

Name	Category	Routes of exposure	Target Organs
Styrene	Category 3	Not applicable	Respiratory tract irritation

Specific target organ toxicity (repeated exposure)

Name	Category	Routes of exposure	Target Organs
Styrene	Category 1	Inhalation	ears

Aspiration hazard

Name	Result
Styrene	Aspiration Hazard – Category 1

Information on the likely routes of exposure

Not available

Potential acute health effects

Eye contact Causes serious eye irritation.

Inhalation Harmful if inhaled. May cause respiratory irritation.

Skin contact Causes skin irritation.

Ingestion Irritation to mouth, throat and stomach.

Symptoms related to the physical, chemical and toxicological characteristics

Eye contact Adverse symptoms may include the following: pain, or irritation, watering, redness.

Inhalation Adverse symptoms may include the following: respiratory tract irritation, coughing.

Skin contact Adverse symptoms may include the following: irritation, redness.

Ingestion Adverse symptoms may include the following: irritating to mouth, throat and stomach.

Mobility in soil

Soil/water partition coefficient (Koc) Not available

Other adverse effects No known significant effects of critical hazards.

13. DISPOSAL CONSIDERATIONS

Disposal Methods

The generation of waste should be avoided or minimized wherever possible. Empty containers or liners may retain some product residues. Dispose of surplus and non-recyclable products via la licensed waste disposal contractor. Disposal of this product, solutions and nay by-products should at all times comply with the requirements or environmental protection and waste disposal legislation and any regional local authority requirements. Avoid disposal. Attempt to use product completely in accordance with intended. Waste packaging should be recycled. Incineration or landfill should be considered when recycling is not feasible.

Special precautions

This material and its container must be disposed of in a safe way. Care should be taken when handling emptied containers that have not been cleaned or rinsed out. Empty containers or liners may retain some product residues. Do not cut, weld or grind used containers unless they have been cleaned thoroughly internally. Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers.
